

Capitol City Legacy
Tree Program

Trees are the best monuments that a man can erect to his own memory. They speak his praises without flattery, and they are blessings to children yet unborn.

Lord Orrery, 1749

City of Montgomery Fain Park Nursery

Your special gift will take its place as an important part of the urban forest, making its contribution to the beauty of the city, the purity of the air we breathe and the water we drink.

**Tree planting February 2005 at
Capitol Heights Junior High School.**

The Capital City Legacy Tree Program provides a way for individuals and groups to invest in the future of Montgomery by planting a tree as a living remembrance of a loved one or a celebration of a happy event.

The Montgomery Tree Committee, Inc. is a non-profit organization established to improve and beautify our urban environment. It assists in planting, conserving, and maintaining our urban forest.

Donations can be made in any amount and will be combined with other contributions to provide trees to be planted on public lands in our community. Trees provide a sense of belonging and community and improve the quality of life for all. Trees are a growing and living symbol of the individuals and/or events they represent and commemorate.

All contributions will include a certificate of notification for the family and the contributor. All contributions are tax deductible.

How much does it cost?

One tree with a granite marker costs \$250.00, however donations of any amount are always welcome.

When are the trees planted?

The trees will be planted in the best planting season for Montgomery which is usually the late fall and throughout the winter.

Where will the trees be planted?

Legacy trees are planted on public lands across the city where each one, in its own way, will grow and benefit all of us.

Who does the planting?

The City of Montgomery will plant the tree in a public location and install the granite marker.

***Someone's sitting in the shade
today because someone planted
a tree a long time ago.***

Why Plant Trees?

Trees enrich our environment by providing a natural aesthetic quality to a community.

Trees are a major contributor to the supply of oxygen we breathe—they assist in absorbing carbon dioxide.

Trees are a natural refuge for wildlife.

Trees act as filters and noise absorbers and provide screens for unsightly areas.

Trees contribute to the economic prosperity of a community.
